

The MARSAFENET COST Action IS1105, funded by Horizon 2020 from 2012 to 2016, is a network of experts focusing on international law of the sea from various perspectives (human rights, navigation, marine environment protection, exploitation of marine resources, economic activities at sea, regional seas). MARSAFENET comprises more than 80 researchers from about 40 institutions in 23 countries, both within and outside of the EU.

The Final Conference aims to foster discussion of the most relevant outcomes achieved, involving both academics and interested stakeholders.
